Subject: Expedited Processing Request
ThinKom Solutions
FCC OET Filing # 0347-EX-PL-2007
Submitted 8/9/2007

Dear Sir/Madam:

I am writing to request that you expedite the processing of our request for experimental authorization 0347-EX-PL-2007, submitted August 9, 2007 for FCC approval of our patented, low-profile, broadband, highly efficient, Ku-Band antenna satellite earth stations demonstrations and testing.

Per the description in the request, ThinKom will be performing final system design testing and demonstrations of their new Coms-on-the-Move (CoTM) terminals. These systems are being actively sought by government agencies to be used in conjunction with national security, the war, disaster recovery and public safety. Granting this authorization is in the interest of the general public by assisting in the development of new broadband mobile technologies for highly reliable, ubiquitous broadband data communication. We would appreciate your attention to this matter, and a response as soon as possible. Mike Sires, who works for a US government intelligence agency, is a strong proponent of our unique antenna technology and has offered to be a reference in support of expediting the STA application. He can be contacted by e-mail at michael@longsires.com or by phone at (703) 744-6641.

Sincerely Yours,

Greg Otto
