

Behnam Ghaffari

Subject: FCC File No. 0233-EX-RR-2006

Importance: High

Ms. Colleen VonHollen,

This e-mail is in reference to the TowerStream Corp. experimental renewal application 0233-EX-RR-2006 callsign WD2XMT which we spoke about earlier today by phone. The experimental license is for the use of the band 3650-3700 MHz with an emission designator of 6M00D7W at 3.43 W peak ERP fixed and within 16 km of Dallas, TX (coordinates: N 32-46-46 and W 96-48-15).

Pursuant to FCC 05-56 Wireless Operations in the 3650-3700 MHz Band, the above location is too close to an existing grandfathered FSS earth station licensee (approx. 18 km), and it will violate the protection zone set forth for the following licensee, Megastar Inc. Callsign No: KA306, File No. SES-RWL-20020303-00266.

Please prior coordinate with Megastar and have them to send you a confirmation either by official letter or email indicating that your proposed location and experiment WILL NOT interfere with their existing operation.

Responses to the items indicated above must be received by the Commission from TowerStream Inc. before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 8, 2007 may result in the application's dismissal pursuant to 47 CFR, Section 5.67 and forfeiture of the filing fee pursuant to 47 CFR, Section 1.1108.
