In response to your expedite request, we have the following issues. Band 4.9-5.1 GHz is a restricted band in the US under footnote US246 and we can not authorize testing on that band. Band 5.47-5.725 GHz is a shared band and will need NTIA coordination that could add 45 - 60 days processing time. I can authorize the 5.725-5.8 MHz right away if that band alone will satisfy your requirements. Please advise on how you want to proceed with the two upper 5 GHz bands. This would also apply to your other applications for the same testing.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 01, 2006 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
