TransCore ITS, Inc. FCC Form 442 File No. 0134-EX-PL-2003 Exhibit A

Narrative Statement

TransCore ITS, Inc. ('TransCore'), manufactures and markets an Automatic Vehicle Monitoring System, an electronic radio-based identification system which uses a unique tag scanning scheme to operate in the 902-904 and 909.75-921.75 MHz and 2400-2483.5 MHz bands.

This device is marketed to the toll, fleet, railroad, and intermodal industries. TransCore plans to test and demonstrate the 900 MHz equipment throughout the United States. TransCore plans to test and demonstrate the 2400 MHz equipment only in Albuquerque, New Mexico, for specific export applications.

TransCore submits that issuance of a license is in the public interest, convenience, and necessity because its grant will facilitate the development of more efficient systems for managing the movement of transportation vehicles.
