Re: Form 442 file no. 0402-EX-PL-2009, confirmation no. EL524205
Subject: Experimental license application for TransCore

Dear Sir,

This letter provides justification for the experimental license application referenced above for TransCore. This experimental license application desires to extend for 5 years the previous Special Temporary Authority granted to TransCore dated May 23, 2008. Reference call sign WC9XXG, file no. 0231-EX-ST-2008.

TransCore designs and manufactures Radiofrequency Identification (RFID) systems at their Albuquerque, NM technology center. As such, engineering development and testing of these RFID systems requires that TransCore be able to transmit the various frequencies under development for extended duration in order to properly evaluate the quality and performance of their designs. It is for this reason, to enable TransCore to properly design, test and de-bug their RFID systems, for which the experimental license is requested.

Thank you for your assistance in this matter. Please contact me should you require additional clarification of this request or the justification provided.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Slowik". The signature is fluid and cursive, with a large loop at the end.
