

Exhibit 1

TrellisWare Technologies, Inc. is requesting an FCC experimental license to fulfil the requirements of a government contract with the United States Government.

Agency: CERDEC, US Army, via National Spectrum Consortium

Contract #: NSC-17-7090

Contract Title: Military Full Duplex Radio

Government POC: Herald Beljour; (973) 445-9263; herald.beljour.civ@mail.mil

Narrative Statement: TrellisWare Technologies, Inc. is currently under a contract with the National Spectrum Consortium in support of the end customer CERDEC (US ARMY). The objective of this contract is for the development and prototyping of innovative spectrally efficient technology. As part of efforts under this contract, an initial fixed tactical system test demonstration is required to test the Surrogate Tactical Radio Relay (TRR).

Previous demonstrations were successful in the upper L-band, and TrellisWare is respectfully requesting an update to the existing experimental license to allow testing in the lower L-band and S-band.
