

TRELLSWARE TECHNOLOGIES, INC.
FORM 442 STATEMENT CONCERNING
FAA, AFTRCC & SIRIUS CONSENT

In its accompanying application for an experimental license, TrellisWare Technologies (“TrellisWare”) requests authority to operate in the 1391-1434 MHz, 1670-2315 MHz, and 2396-2600 MHz frequency bands for the purpose of conducting testing and experiments for product development of its TSM-enabled software defined radios (“SDRs”). As these bands do not coincide with those requiring coordination/consent from the Federal Aviation Administration (“FAA”), Aerospace & Flight Test Radio Coordinating Council (“AFTRCC”) or SiriusXM Radio (“Sirius”), no exhibit concerning those entities is attached.
