

TrellisWare Technologies, Inc.
Application No. 0300-EX-CN-2018
Narrative Statement Regarding
Government Contract

Agency: U.S. Special Operations Command

Contract No. H92222-17-D-0024

Government POC: Mr. Christopher Yates, (813) 826-1355, christopher.yates@socom.mil

TrellisWare Technologies Inc. (“TrellisWare”) is currently under contract to USSOCOM to deliver software-defined tactical radios. In order to test and validate these radios, TrellisWare needs to conduct real-world testing at multiple frequencies, specifically the 225-450 MHz and 1375-1390 MHz bands.

TrellisWare’s plans to operate in the 225-400 MHz spectrum range only on frequencies that are outside the FAA’s “Annex A” bands. Officials state that no FAA coordination is required for the 225-400 MHz band, because no Annex A bands are included.

Regarding the 1375-1390 MHz, FAA coordination is listed in another exhibit. The FAA coordination number is NG T180196.
