

cc: Glenn Tallia, NOAA GC

Tahara D. Dawkins
Director, Commercial Remote Sensing
Regulatory Affairs

Sincerely,

This determination applies to the CICERO mission only. Please contact NOAA with any future missions you may plan to operate to obtain a licensing determination on that specific mission. Please be advised that this NOAA determination does not relieve you of the obligation to receive any other U.S. Government licenses, permissions or permits for the export, launch, or operation of a private spacecraft.

The National Oceanic and Atmospheric Administration (NOAA) Commercial Remote Sensing Regulatory Affairs Division (CRSRA) has received and reviewed your Initial Contact Form concerning your proposed remote sensing imager. By the authority given to the U.S. Secretary of Commerce under the National and Commercial Space Programs Act of 2010, 51 U.S.C. §§ 60121, *et seq.*, and as delegated to NOAA, we have determined that your proposed mission will not be require a NOAA operator's license based on the stated fact that your system does not appear as remote sensing.

Dear Mr. Prasad:
