Dear Sir,

Enclosed is a copy of FCC Form 442, amended from application file number 0020-EX-PL-1998. We have modified the scope of the project to include operations throughout the Hawaiian Island chain, to better correspond with the scope of the federally funded research grant, and modified the number of units from 3 to 4. All units will be operated in a mobile configuration, deployed around coastal regions of the Hawaiian Island Chain as dictated by scientific demands and need for the produced data.

Since approximately one month before the application was filed, we have been periodically monitoring 16.046MHz at potential sites and other areas around the island, and have to date not found any traffic on this frequency, +/- 200KHz.

Thank you for your consideration. Questions concerning this amendment can be addressed to Michael Sawyer (808-956-5179) or Derek Young (808-956-6418), or at the address on the application form.

3. Application for Modification: Check the box beside all particulars to be modified. Check either addition or replacement to indicate whether the change is an addition or a replacement of parameters in the current authorization.

- FREQUENCY - EMISSION - POWER - LOCATION -
 addition or replacement? addition or replacement? addition or replacement? addition or replacement?
 OTHER PARTICULARS - addition or replacement? (Describe below or in attached EXHIBIT No. _____)

4. Particulars of Operation (see instruction below)

Frequency (state whether kHz or MHz) (A)	POWER			EMISSION (E)	MODULATING SIGNAL (F)	NECESSARY BANDWIDTH (kHz) (G)
	(B)	(C)	(D)			
16.046 MHz	30W	30W	Peak Mean	F1X	Linear Chirp	125KHz

- (A) List each frequency or frequency band separately. (If more space is required, attach as EXHIBIT No. _____)
(E) Insert maximum R.F. output power at the transmitter terminals. Specify units.
(C) Insert maximum effective radiated power from the antenna (If pulsed emission, specify peak power). Specify units.
(D) Insert "MEAN" or "PEAK" (See definitions in Part 5).
(E) List each type of emission separately for each frequency. (See Section 2201 of FCC Rules)
(F) Insert as appropriate for the type of modulation:
(1) the maximum speed of keying in bauds;
(2) maximum audio modulating frequency;
(3) frequency deviation of carrier;
(4) pulse duration and repetition rate.
For complex emissions, describe in detail in the space provided below.
(G) Describe how the necessary bandwidth was determined in space provided below.

12. Is the equipment listed in Item 13 capable of station identification pursuant to Section 5.152? YES NO

14. Will the antenna extend more than 6 meters above the ground, or if mounted on an existing building, will it extend more than 6 meters above the building, or will the proposed antenna be mounted on an existing structure other than a building? YES NO

If "YES", give the following (see instruction 9):

- (a) Overall height above ground to tip of antenna is _____ meters.
- (b) Elevation of ground at antenna site above mean sea level is _____ meters.
- (c) Distance to nearest aircraft landing area is _____ kilometers.

(d) List any natural formations of existing man-made structures (hills, trees, water tanks, towers, etc.) which, in the opinion of the applicant, would tend to shield the antenna from aircraft and thereby minimize the aeronautical hazard of the antenna.

(e) Submit as EXHIBIT No. _____ a vertical profile sketch of total structure including supporting building, if any, giving heights in meters above ground for all significant features. Clearly indicate existing portion, noting particulars of aviation obstruction lighting already available.
