RE: WO9XPA, Satellite transmission notification

Dear Mr. Knapp,

This letter serves as notification to meet Special Condition 3 of Experimental License WO9XPA that transmissions have ceased from our satellite. At approximately 15:28 UTC on 06 December 2019, the LYNK, also known as UbiquitiLink, payload along with the Cygnus NG-11 spacecraft re-entered and burned up in the Earth's atmosphere.

We appreciate you and your team's continued support as we prove out our technology in experimental licenses. Our rapid development schedule would not be possible without your team. Thank you for your time and service.

Best Regards,

A handwritten signature in cursive script that reads "Margo R. Deckard".

Margo Deckard
COO
Lynk Global Inc (formerly UbiquitiLink INC)
