Re: Consent for experimental use of 900 MHz Channels

To Whom It May Concern:

United Parcel Service, Inc. ("UPS") has notified PDV Spectrum Holding Company, LLC, owned and operated by Anterix, Inc. ("Anterix"), that it has filed for an Experimental Authorization (the "Experimental Authorization") with the Federal Communications Commission ("FCC"). UPS has requested Anterix's permission to operate on frequencies (the "Frequencies") and in the locations associated with the licenses held by Anterix listed on Attachment A (the "Licenses").

This Letter provides Anterix's consent to UPS's operations using the Licenses from the date of granting of the Experimental Authorization until the end of the associated designated term (the "Term"). Anterix confirms that the UPS operations have been coordinated with Anterix and are not expected to cause unacceptable interference to Anterix operations.

Anterix appreciates that UPS recognizes the importance of private enterprise-grade LTE networks in support of its mission-critical business communications and applications. Anterix is equally pleased that UPS plans to test the functionality of private enterprise-grade LTE networks leveraging Anterix's 900 MHz spectrum, enabling more secure and reliable support for time-critical communications. Anterix will work with UPS to test these new solutions by leveraging high-performing and highly available communication solutions.

The consent Anterix provides by this letter is conditioned on the following:

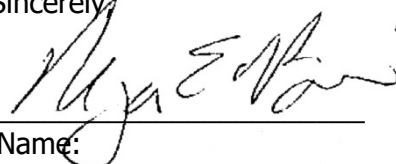

- 1) UPS shall maintain the Experimental Authorization as active and valid during the duration of the Term. UPS shall be responsible for all costs and expenses relating to the Experimental Authorization and its operations using the Licenses.
- 2) UPS shall conduct its experimental demonstrations in strict conformance with the technical parameters, protocols and other information submitted in its Experimental Authorization application and the Special Conditions listed on the Experimental Authorization once granted by the FCC.

- 3) UPS shall terminate its operations using spectrum authorized under the Licenses immediately upon notice from Anterix that harmful interference is being received with regard to its operations. UPS shall not re-commence operations until the harmful interference is resolved in Anterix's reasonable discretion and Anterix gives its consent. UPS shall resolve all harmful interference at its own cost and expense.

Should the Commission require any additional information, please contact the undersigned. Thank you for your attention to this matter.

Sincerely,

Name:

PDV Spectrum Holding Company, LLC
c/o Anterix, Inc.
