

**Exhibit 4**

**Environmental Assessment**

Item 9 of FCC Form 442 asks “Would a commission grant of this application come within Section 1.1307 of the FCC Rules, such that it may have a significant environmental impact.” United Wireless Communications, Inc. (“United Wireless”) has answered “No” to this question in its application for an Experimental Radio Service License (File No. 0761-EX-CN-2017) as facilities authorized under an experimental radio license for a period not to exceed twenty-four months are exempt from review pursuant to the *Nationwide Programmatic Agreement Regarding Section 106 (NHPA)*.<sup>9</sup> As United Wireless is not requesting experimental authority for a period exceeding twenty-four months, environmental assessment provisions of Section 1.1307 of the Commission’s Rules are inapplicable. Nevertheless, United Wireless understands that it must comply with Commission rules and regulations governing environmental and historic preservation matters, and confirms that it will do so before commencing permanent operations.
