Since 1925, the Federation of National Amateur Radio Societies  
Representing the Interests of Two-Way Amateur Radio Communication

**ARC-1**

**Denise Thorsen**

**7 November 2013**

Dear Denise

Thank you for the coordination request. I have discussed your request with the advisory panel. The coordinated frequencies are

Up and Downlink	437.565 MHz
Downlink	2440 – 2450 MHz

The above frequencies have been coordinated with the understanding that you have agreed to the IARU terms of reference for the use of amateur service spectrum for experimental purpose.

Please advise us the final launch date once it is known. You have indicated November 2014. Although we have avoided coordinating frequencies which have already been coordinated for other known satellites on the same mission, it remains your responsibility to check for any possible conflict and advise us accordingly.

**Please also confirm the name and full contact details of the person who will control the operation of ARC-1 after launch.**

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

We have noted the measures taken in controlling the satellite. We however draw your attention to the attached paper "controlling satellites" which sets out the requirements as per ITU regulations.

Best wishes for a successful project. Please keep us informed of progress.

Hans ZS6AKV
