

Applicant: University of Alaska, Poker Flat Research  
Range

File Number: 0293-EX-CN-2017

Correspondence Reference Number: 37619

Justification for license period exceeding two years.

Statement:

This research is for a multi-year study of middle atmospheric dynamics through the detection and analysis of ion trails from incoming meteors. The National Science Foundation (NSF) has funded this project for a five year initial study. Depending on results from this research, we can expect additional funds to be allocated for future experiments.
