Subject: Additional Information Request

---

Message:

What is the estimated altitude of the spacecraft at the end of the 12 month operational period?

Are there any plans to use the on-board propulsion for collision avoidance or accelerating deorbit at the end of the operational mission timeframe?

Please describe the design and operational strategies, if any, that will be used to minimize the risk of collision and avoid posing any operational constraints to all inhabitable spacecraft.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of August 12, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
