Subject: Additional Information Request

---

Message:

1) you have 2400-2405 MHz in your application but the supporting documents (narrative, ODAR, ITU) suggest a spot frequency 2402 MHz with a bandwidth of 1 MHz. Which one is it?

2) When you make the above changes, please make sure to enter the 2402 MHz as a separate antenna since the gain value is different. Remove the 2400-2405 MHz that's under the antenna # 1 in your application.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 24, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
