RE: NOAA Commercial Remote Sensing Regulatory Affairs License Inquiry

Dear Mr. Fried and Dr. Palo,

The National Oceanic and Atmospheric Administration (NOAA) Commercial Remote Sensing Regulatory Affairs Office (CRSRA) has received and reviewed your Initial Contact Form concerning your proposed mission. By the authority given to the U.S. Secretary of Commerce under the National and Commercial Space Programs Act of 2010 (P.L. 111-314), and as delegated to NOAA, we have assessed that your proposed mission will not be required to apply for a NOAA operator's license. This does not relieve you of the obligation to receive any other U.S. Government licenses, permissions or permits for the export, launch, or operation of a private spacecraft.

This applies to the University of Colorado Earth Escape Explorer (CU-E³) satellite mission only, and is based on the Initial Contact Form that was submitted on April 6, 2017. Please contact NOAA with any future satellite missions you may plan to operate to obtain a licensing determination on that specific mission.

Sincerely,

Tahara D. Dawkins
Director, Commercial Remote Sensing
Regulatory Affairs
