

QUESTION 4: STATEMENT REGARDING GOVERNMENT CONTRACT

This work is performed under NASA contract NNX17AK79A to the University of Colorado. The goal of the government sponsored research project is to build a wireless communications testbed to evaluate the (1) performance of different wireless RF technologies (e.g., LTE/5G, 802.11 Wi-Fi), and (2) to demonstrate multi-vendor interoperability of the wireless networking communication systems in support of space exploration missions and activities.
