---

Message:

Mr. Lee- we use this range as it is the range that the radar was developed for to be able to detect the snow and sea ice. for this experiment we will not be radiating over land but over the ocean only. This is duplicate request of WQ9XYY since we were unable to fly then. We have also flown this radar over areas around Fairbanks, and Wrangell Mountains in Alaska., Greenland and Canada. This radar has never experienced any interference issues.
