Message:

You requested information on the difference between our calculations of 39.8 picoWatts and the license request of 251 picoWatts. The manufacturer of the item that we would like to purchase recommends 251 picoWatts, which is calculated in free space. This is the value we entered into the license request. If I may reference the manufacturer's calculations for the budget, they may be found at http://www.gpssource.com/files/calc_006-2.htm.

Please contact me if you require further information.

Thank you.
