

THE UNIVERSITY OF NORTH CAROLINA AT WILMINGTON

17 October 2017

**Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554**

**Re: Amendment to Experimental Radio Station Authorization**  
File # 0469-EX-CN-2017

The University of North Carolina at Wilmington (UNCW) hereby amends the above-referenced application, which was filed on June 14, 2017, as follows:

**1. Satellite UHF Downlink frequency – from 400-440 MHz to 400-420 MHz**

UNCW is changing its initial request to operate in the 400-440 MHz band (downlink) to 400-420 MHz. As the amateur band of 435-438 MHz has been dropped from the UNCW application, item 4 of Correspondence Reference Number 39184, “Obtain and submit a consent letter from the International Amateur Radio Union IARU for the use of 435-438 MHz”, is no longer applicable.

**2. Revised Exhibits**

All exhibits, the NTIA data forms and SpaceCap have been revised and resubmitted to reflect the change of UHF downlink frequency band to 400-420 MHz.

**3. Earth Station Receive Data for the 400-420 MHz Downlink**

The NTIA Data Form and Exhibit 3 - “For Reference Only” have been revised to add earth station receive data for the 400-420 MHz downlink

Respectfully,

**John M. Morrison**  
**Professor of Physics and Physical Oceanography**  
**Associate Director for Educational Planning**
