

Change Notice for Application 0159-EX-CN-2021

Oct 19, 2021

The Lat-Long of the original application filed February 18, was

Latitude: 38-06-45 N

Longitude: 080-15-58 W

This data may have come from original station documentation that used a previous NAD coordinate convention. It was updated to

Latitude: 38-07-01 N

Longitude: 080-16-04 W

The ERP shown in the original application filed February 18, was 108 Watts.

The ERP was updated in the application to 217 Watts on July 7.

All exhibits have been reviewed and updated as necessary, for conformance to these current values, including the NTIA Space Record Data form and the Spacecap (both of these had the current value for power, they were updated for ground station Lat-Long only).
