

To facilitate continued testing, this modification requests the addition as points of communications the following satellites as well as operation under their associated coverage footprints:

Satellite	Location
GE-23	172 degrees East longitude
AMC-21	125 degrees West longitude
AMC-15	105 degrees West longitude
T-14	63 degrees West longitude
T-11N	37.55 degrees West longitude

Coordination letters from each of the respective satellite operators are being provided as a separate attachment.

Other than the addition of the points of communications and associated coverage area, no changes to the operational emissions of the existing license are requested.
