

ViaSat, Inc.

ATTACHMENT

Purpose of the Operation:

Approval of this experimental license will allow ViaSat to perform testing of new modem burst waveforms and time division multiple access (TDMA) framing.

Testing will use one 1.8 m antenna as a simulated hub and up to fifty 75 cm antennas as simulated user terminals.

During testing, transmissions will be sent to ViaSat's WildBlue-1 and Anik-F2 satellites at 111.1 degrees west longitude, and monitored by ViaSat engineers as well as the ViaSat satellite operations center. If in the event interference is detected or for any other reason it is necessary to cease transmissions, ViaSat maintains a 7/24 Network Operations Center which can be reached at 1-720-493-7300.
