Subject: 0745-EX-CN-2020 pre-coordination data request

Message:

The purpose of this correspondence is in response to an email from the FCC OET dated 9/1/2020 stating that prior coordination with the FAA is required for use of the noted frequencies before FCC processing of the application can continue and that the pre-coordination needs to be completed within 30 days of 09/01/2020 or the application may be dismissed by the FCC.

Virgin Galactic is working on the frequency pre-coordination with the FAA as required. However, we expect that this activity will likely extend beyond the 30 days from the application filing date of 09/01/2020.

Therefore, we kindly request that our application not be dismissed and be given until 10/30/2020 to file the pre-coordination documents.

Kind Regards,
Greg Fredenburg
Head of Regulatory Compliance
Virgin Galactic
