Message:

Leann-

Here is some follow up information on the request for nationwide use of the system.

The nationwide request is for a mobile system to be set up at a particular site and used for a limited period of time. The use for the de-ployable RADAR includes many short notice research events that may occur anywhere in the U.S. that allow little advanced planning. Coordinating filings for each location would be prohibitive given the processing times for individual applications for the same use case in different locations.

If the FAA still has concerns, could you please provide me the coordinators contact information in order to work with them directly to resolve?

Thank you.
