Application Narrative for Proposed Equipment

Proposed Program

Wi-Tronix is proposing GPS within their experimental lab for testing purpose.

Objectives

We seek to accomplish the following objectives:

1. Illumination of the part of the lab, located at 631 E Boughton Rd, Suite 240, Bolingbrook, IL with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their units to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information
