

APPLICATION FOR SPECIAL TEMPORARY AUTHORITY

Winged Vision, Inc.

File No. 0126-EX-ST-2017

Various locations for NASCAR racing and other sporting event video production

NARRATIVE AND FREQUENCY COORDINATION EXHIBIT

This application seeks Special Temporary Authority for video production from aircraft in support of broadcast network operation during a series of televised sporting events. The applicant is professionally engaged in video production operations for clients and has been retained to provide video feeds for television network broadcast from aircraft near the stadiums, automobile and horse race tracks, arenas and golf courses listed on the attached list, on the dates specified.

This application proposes the use of the band 2390-2416 MHz for video downlink transmissions from aircraft to production vehicles on site. The applicant is a licensee of the Commission for video and audio production purposes but the normal LTTS, BAS and Land Mobile channels available for this operation are generally unavailable due to intensive use at the large-scale sporting events listed on the attached list.

Operation will occur only on the specific dates listed, and otherwise during the period February 18, 2017 through July 31, 2017.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the relevant broadcast markets. However, this application proposes the use of frequencies that are allocated on a primary basis to the Amateur Radio Service. Operation will be coordinated in advance with ARRL, the national association for Amateur Radio, and with local Amateur Radio frequency coordinating entities in the listed metro areas.

Should any interference be reported to any licensed user in the band or in adjacent spectrum, Winged Vision STA operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Mr. Robert Mikkelson will act as the "Stop Buzzer" contact on site. His mobile telephone number is 301-332-0334. Otherwise, any information can be obtained from counsel for the applicant:
