

## **APPLICATION FOR SPECIAL TEMPORARY AUTHORITY**

**Winged Vision, Inc.**

**File No. 1688-EX-ST-2019**

**Various locations for sporting event video production (EVENT LIST #2)**

### **NARRATIVE AND FREQUENCY COORDINATION EXHIBIT**

This application (the second of two being contemporaneously filed) seeks Special Temporary Authority for video production from aircraft in support of broadcast network operation during a series of televised sporting events. The applicant is professionally engaged in video production operations for clients and has been retained to provide video feeds for television network broadcast from aircraft near and above stadiums, arenas and baseball fields during the period October 15, 2019 through April 14, 2020.

This application proposes the use of the band 2390-2420 MHz for video downlink transmissions from aircraft to production vehicles on site. The applicant is a licensee of the Commission for video and audio production purposes but the normal LTTS, BAS and Land Mobile channels available for this operation are generally unavailable due to intensive use at the large-scale sporting events listed on the attached list.

Operation will occur during the period October 15, 2019 through April 14, 2020.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the relevant broadcast markets. However, this application proposes the use of frequencies that are allocated on a primary basis to the Amateur Radio Service. Operation will be coordinated in advance with ARRL, the national association for Amateur Radio, and with local Amateur Radio frequency coordinating entities in the listed metro areas. The segment 2390-2395 MHz is not being used for Aeronautical Flight Test Telemetry so there is no need to coordinate this with AFTRCC.

Should any interference be reported to any licensed user in the band or in adjacent spectrum, Winged Vision STA operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Mr. Robert Mikkelson will act as the "Stop Buzzer" contact on site. His mobile telephone number is 301-332-0334. Otherwise, any information can be obtained from counsel for the applicant:
