Message:

Please specify center point (Lat/Long in deg min sec) and a radius (kilometers) for single geographic location as per our discussion. The application still shows nationwide operation.

=====

The Wireless Seismic, Inc., application has been amended via the FCC/OET ELS
“Amend/Complete Application Page” hyperlink to include the center point coordinate and
radius frequency information

All frequencies have been grouped under single geographic locations and put as a different antenna
locations in the application.
