Subject: Request for Info - File # 1012-EX-ST-2020

---

Message:

Please revise your application to include the following:

1. Explanation of how it would coordinate any usage with a Spectrum Access System (SAS).
2. Explanation of how it would specifically avoid causing interference to incumbent and commercial operations in the band, including General Authorized Access (GAA).

Additionally, please provide answers to the following questions:

1. The application appears to be focused on the applicability of the technology to future operations under Part 96. Since that rule part only covers the 3550-3700 MHz band, why does the application needs to test in the 3300-3550 MHz and 3700-3800 MHz bands?
2. How will the application avoids causing interference to existing users, including FSS earths stations, in the 3700-3800 MHz band?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 23, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
