Message:

Comments addressing NTIA manual 8.3.28 have been prepared and saved as a pdf. The document will be submitted as a PDF attachment using the Amend/Complete Application since there seems to be no way to attach documents via this link. Included in the document is a screen capture of a GPS Source calculator showing the signal strengths will comply with in FCC spec.

A building floor plan showing the entire building and Carlson Lane lot will be submitted using the same Amend/Complete Application link. The Lot plan clarifies the detail that the proposed antenna location is an interior wall.
