Experimental License Modification Application
File Number 0052-EX-CM-2020

Supplemental Exhibit
Responses to OET Requests for Information

OET sent an inquiry regarding whether the area of operations for the proposed modification would be the same area of operations as the existing license. The answer is yes, this modification is for the same area of operations and the same type of operations.

The proposed operations will use the 902-928 MHz frequency for uplinking data only. There will be no downlink in that band.
