

AAI / Textron Systems is the provider of the Orbiter Small-Unmanned Aircraft Systems that supports tactical applications and technology development for the U.S. military. The Orbiter has over 1000 hours of flight for the Army, SOCOM and Marine Corps providing support to our troops in the US and overseas. In addition, it supports NASA and other institutions for scientific missions. Our new technologies group develops, investigates and integrates technologies to support the future and current needs of the government.

Orbiter is a tactical S-UAS that provides EO/IR and scientific mission support. The Orbiter is a 20 pound aircraft powered by an electric engine.

Current government contract with SOCOM for the USMC is - CSISC10-AAI Corp-0011-001 with Compass Systems – located at Army Yuma Proving Ground, Yuma, Az.

Thank you for your consideration. Should you desire any additional information on this request, please feel free to contact me at 240-925-4158 or email Mercado@aaicorp.com

Sincerely,
