Subject: Request for Info - STA File #0656-EX-ST-2016

Message:

Only the Boston location has frequency and emission data present. These data need to be entered for the other 10 locations. The easiest way to do this is to use the "Copy this antenna" feature from the Boston antenna. This would copy all the frequency and emission data. You would then need to change the location data for each of the 10 times the antenna was copied and then you would need to delete the 10 locations that presently have no frequency or emission data.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 19, 2016 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
