Subject: Additional Information Request

Message:

In reference to correspondence with ref code 64683:

The large object collision risk number referenced in our most recent ODAR as less than .001 is 0.3569E-04 as calculated using the DRAMA-ARES v3.0.3 software and appended in our ODAR uploaded as MyRadar Drama V3.0.4-Signed-09.16.2021.pdf

This figure is taken directly from the software output and is the ACP_w calculation. When converted, it is 0.00003569.

Thank you
