

Narrative Statement

0598-EX-ST-2010

Aadaptrum, Inc. has an appointment with OET Chief Julius Knapp on January 4, 2011 and seeks this STA to demonstrate its new TV Band Device.

This device complies with all the new Part 15, Subpart H rules with the exception of the database requirements – which are impossible to meet until FCC completes its database provider selection.

This STA is for this demonstration only.

In anticipation of an SBE coordination requirement, Adaptrum has notified James Snyder, the SBE coordinator for Washington DC and requested advanced coordination.

Adaptrum has been an active participant in Docket 04-186 and has previously submitted equipment for FCC Laboratory testing.

The frequencies requested are TV channels 21, 26, 40, 43, 44, and 51 which we believe are available at this location at 40 mW power under the new rules.
