

Exhibit 1

This application seeks Commission consent to modify the Station WK2XZV license to:

- Update the transmitting equipment list to include 2 additional models:

SRR6-B and ARS6-A

- Extend the frequency range from 76-77 GHz to: 76-81 GHz (and associated changes to ERP and emission designator)
- These changes will permit the development of the additional models SRR6-B and ARS6-A, which are ADC's new generation of radar sensors. These models will have additional features such as higher maximum detection range, enhanced Field of view and support of 76-81 GHz frequency band for better parking assistance.
