Mr. Cole

We are reviewing your license and are ready to process it. The confidential exhibits that were submitted with your application are more than we need to process the license. If you will submit a short paragraph describing the nature of your proposed experiment we will return those exhibits. Your description should be general enough that it may be made available for public inspection. You may either reply to this email or fax your narrative to me at 202-418-1918. If you have any questions, I may be reached at 202-418-2456.

Tony Serafini
