Hayward, CA 94545

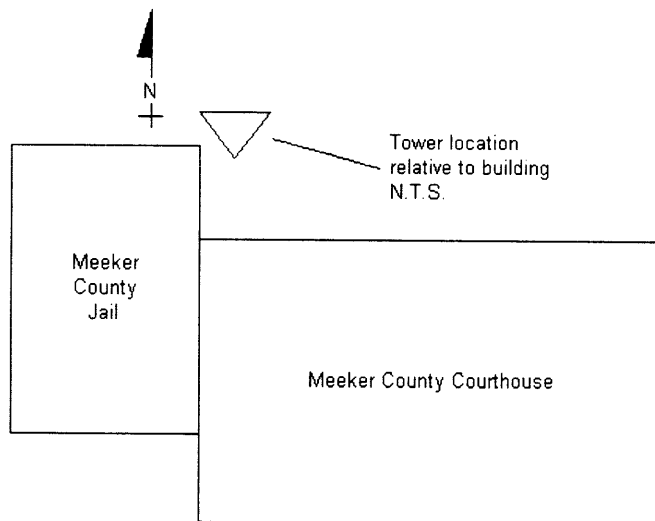

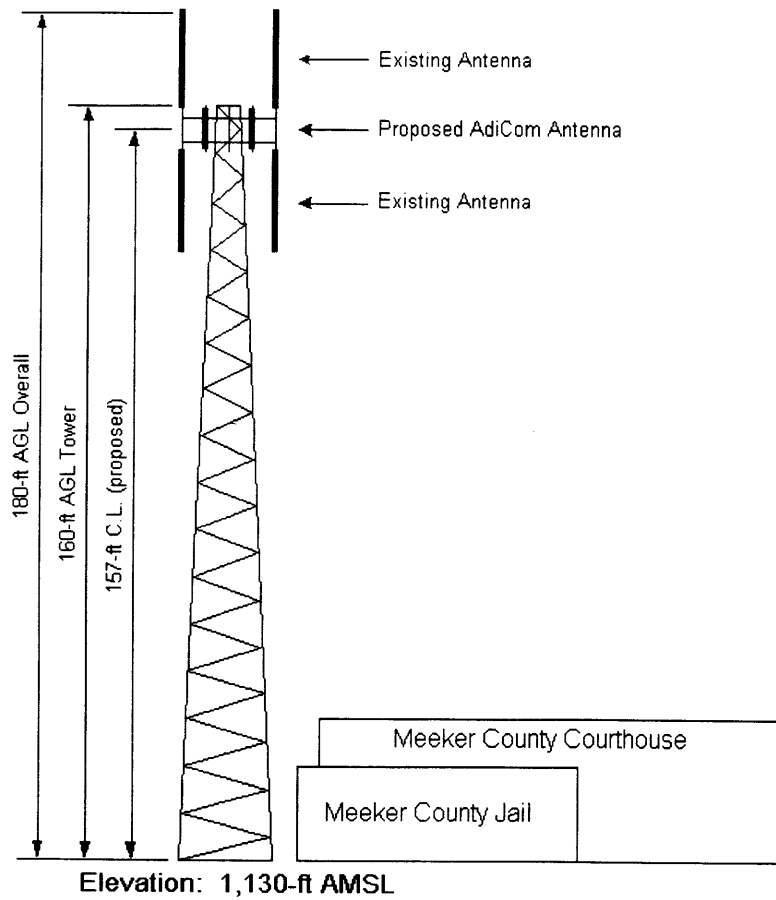

ATTACHMENT TO FCC FORM 422 APPLICATION

RESPONSE TO ITEM NO. 10 (c)

Question: How will the program of experimentation have a reasonable promise of contribution to the development, extension, expansion, or utilization of the radio art, or it along a line not already investigated.

Answer: Adicom Wireless, Inc., has proprietary and patented CDMA technology involving dynamically variable processing gain to optimize service quality and crest factor control to reduce peak transmitted RF power. The radio development is an essential ingredient in bringing into practice these technology advances, Adicom's target market, worldwide Wireless Local Loop, promises enormously large deployment of such technology, ultimately resulting in substantial refinement of the are.
