

EXHIBIT No. 1

STATEMENT OF NEED

Advanced Travelers Information Systems, Houston, Texas, is developing equipment in support of a petition for a Notice of Proposed Rulemaking (N.P.R.M.) to be submitted to the Federal Communications Commission. On-air testing and operation is required in the development process in this regard. Additionally, such operation will assist in gathering information in support of the proposed petition.

In order to prevent interference to stations on adjacent channels, output power/and or antenna gain/height will be reduced accordingly, if operations are within the station's primary contour.
