

FCC Form 405
File No. 0195-EX-RR-2001 - AeroAstro, Inc.
November 2001

Supplement to Question 5

AeroAstro wishes to amend its license to operate no more than 50 units nationwide.

AeroAstro requires a nationwide license because it is responding to requests for demonstrations of its low-power, non-interfering technology at widely dispersed sites around the United States. As explained in its original license application, AeroAstro's technology is designed to accommodate a variety of applications over a wide range of operating environments. The geographic range of AeroAstro's demonstrations is comparably diverse.
