

Exhibit 1 ARINC

Request for Confidentiality

Aeronautical Radio Inc. (ARINC) is requesting confidentiality regarding this Special Temporary Authority and attachments because of the type of testing to be conducted.

ARINC is seeking this STA to support a United States Federal law enforcement request to help devise a means by which an aircraft, specifically departing or arriving from Washington's Reagan National Airport, may contact Federal law enforcement directly, by datalink message in the event of an emergency.

ARINC is conducting testing using our standard ACARS datalink emission of 13K0A2D using FCC type certified radio equipment.

Due to the nature of these operations, it was believed that this request should remain confidential.

Please let me know if you require further information.

Sincerely,

Chris Wheatley
