

Antenna Structure Information

Exhibit 5

AERONET WIRELESS BROADBAND CORP.
SAN JUAN, PR

The following pages contain information provided for informational purposes pertaining to the actual installation of the antenna system to be used during these operations in the 3650 - 3700 MHz band.

A – Ground Elevation Above Mean Sea Level (AMSL) 133 meters
B – Overall Height of Structure Above Ground (OHAGL) 24.3 meters
C – Antenna Tip Height Above Ground Level (TAGL) 23 meters
D – Antenna Radiation Center Height Above Ground Level (RCAGL) . . 22.6 meters
E – Site Coordinates: 18-22-36.6 N , 66-7-2.6 W

Not to scale
Other users/antennas not shown for clarity

TOWAIR Determination Results

[? HELP](#)

[New Search](#) [Printable Page](#)

A routine check of the coordinates, heights, and structure type you provided indicates that this structure does not require registration.

*** NOTICE ***

TOWAIR's findings are not definitive or binding, and we cannot guarantee that the data in TOWAIR are fully current and accurate. In some instances, TOWAIR may yield results that differ from application of the criteria set out in 47 C.F.R. Section 17.7 and 14 C.F.R. Section 77.13. A positive finding by TOWAIR recommending notification should be given considerable weight. On the other hand, a finding by TOWAIR recommending either for or against notification is not conclusive. It is the responsibility of each ASR participant to exercise due diligence to determine if it must coordinate its structure with the FAA. TOWAIR is only one tool designed to assist ASR participants in exercising this due diligence, and further investigation may be necessary to determine if FAA coordination is appropriate.
