

Request for Expedited Processing
AERONET WIRELESS BROADBAND CORP.
SAN JUAN, PR

Exhibit A

AERONET WIRELESS BROADBAND CORP. ("AERONET") hereby requests expedited treatment of this application for temporary experimental authorization. Specifically, AERONET asserts that expedited action by the Commission is necessary to ensure that AERONET's proposed temporary experimental services may be deployed without delay and as soon as possible and that a substantial portion of its trial is completed prior to the adoption of any changes proposed during presently conducted Reconsiderations by the Commissions for the possible use of unlicensed devices in the 3.65 GHz band.

AERONET has already in its possession the equipment described in this application, and is prepared to install the equipment. As a result, a lengthy processing delay would not only be detrimental to AERONET's proposed experimental operation. As explained in the instant application, AERONET seeks to demonstrate, through temporary experimental operation, that the 3.65 GHz band is suitable for the operation of unlicensed devices, both inside and outside areas which could be deemed "precluded" by rules proposed by the FCC. Because the Commission is currently reconsidering such rules for the 3.65 GHz band, time is of the essence to ensure that AERONET may immediately commence its experimental operation and have time to report back to the FCC on its findings prior to final establishment of rules relating to the 3.65 GHz band. Accordingly, an expedited grant of the instant application is necessary and in the public interest.
