Subject: Additional Information Request

---

Message:

Thank you for your note addressing the need to secure the concurrence of the license holder of channels, 454.7-454.975 MHz and 459.7 and 459.975 MHz. The concurrence of the license holder, now A2G Communications, LLC, has been submitted to the file.

The modification application has also been amended to request that at the Lanai, HI site, flights be permitted to reach an altitude of 85,000 feet/25.90 km and a 6 km radius of operations.

AeroVironment also asks that WJ2XUP's authorization be extended until December 1, 2020.
