Subject: Request for Info - File # 0517-EX-CN-2026

Message:

Please address the following questions and concerns:

1. Please include the FCC callsign in the cost recovery letter and reupload.
2. Please provide the filing number(s) for all US Earth station operations.
3. Please describe in detail what the simulated RPO will entail. Will these be calculations and/or dummy commands only that will not be sent to the spacecraft?
4. In the spacecap, mark the intersatellite communications 4.4, both transmit and receive. These are not allocated transmissions.
5. Orbital Debris
 - 5(a). In the orbital debris report, page 12, two separate large object collision risk values are presented without further detail. Please explain the scenarios these values represent (spacecraft orientation, is the spacecraft deployed or stowed, etc.)
 - 5(b). The post-mission disposal plans present in the orbital debris report on page 14, is the 350 km target altitude perigee only or both apogee and perigee?
 - 5(c). In the orbital debris report, page 14, you've indicated that station-keeping will cease prior to atmospheric reentry but the calculations starting on page 18 were performed with station-keeping turned off. Please redo all relevant calculations (large object risk, small object penetration, orbital lifetime) with station-keeping turned on.
 - 5(d). Please provide the station-keeping tolerances as required by 47 CFR 5.64(b)(4)(i)(D)
 - 5(e). Please provide the small object penetration number as required by 47 CFR 5.64(b)(2). This should be the overall number as reported by DAS.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of June 01, 2026 may result in application dismissal pursuant to 47 CFR § 5.67 and forfeiture of the filing fee pursuant to 47 CFR § 1.1111.
