

Question 4 Exhibit: Government Research Project and Contract Number

AggieSat Lab is currently developing a satellite payload for a project with the National Aeronautics and Space Administration's Johnson Space Center (NASA JSC) to fly on the Space Shuttle in Spring/Summer of 2009. Our vehicle will be testing GPS technologies on behalf of NASA JSC.

We are developing ground station capabilities as per this application to support that flight. This mission is being flown with the support of David Kanipe, NASA, part of the Aero-sciences and Flight Mechanics Division at NASA JSC.

Our government contract number is:

NNX08AC83G
