After testing its 900 MHz channels under its current STA (S-2141-EX-95), AirNet now realizes that it needs more power to effectively run its testing program. AirNet would like to increase the power on its 900 MHz license (Station KM2X0Q) to 100 watts ERP, and 10 watts transmitter power. (AirNet will soon file its PCS application with the same power.) Because a modification application was submitted on 10/4/95 and still remains pending, would it be faster if AirNet simply amended that pending application? How should we proceed? Please call me at (202) 408-7172. Thanks. Russ Taylor
